

SREC Aggregation Internship - Remote

Carbon Solutions Group is seeking a Summer Intern to join its Environmental Commodities Management - SREC Operations team. This is an opportunity to gain experience in the solar energy industry at a growing company. The role will work closely with the origination team and play a role in new market expansion and support customer onboarding for Carbon Solutions Group.

Interns are responsible for managing the customer experience at Carbon Solutions Group for more than 15,000 solar contracts with residential and commercial system owners. Workflow includes managing system registrations across different environmental commodity markets, managing inbound and outbound communications via both phone and email, and managing new customer onboarding. Interns can also explore additional, varied CSG divisions as they become more efficient in their role.

Carbon Solutions Group is a distributed decarbonization platform that was founded in Chicago Illinois in 2006, and consists of 3 business lines; Solar Aggregation, Dirt Road EV, and Wholesale ESG services. CSG has a proprietary customer onboarding platform that has quickly onboarded 15,000 solar contracts in two years. The Dirt Road EV division currently has 500 charging stations in development throughout the US. Wholesale ESG has transacted 150 Million MWh's of environmental attributes since 2017. Customers rely on Carbon Solutions Group to sell their solar renewable energy credits (SRECs), an important source of revenue from their solar installations.

Key Responsibilities:

- Introduction to the basics of solar renewable energy credits in compliance markets.
- Learn new customer onboarding including submitting SREC registrations and applications in applicable systems.
- Weekly meetings with the executive management team to explore Dirt Road EV, and ESG.
- Track customer registrations and follow up with the appropriate parties to collect missing information or documents.
- Direct outreach to the appropriate internal team as needed

The ideal candidate should have an interest in ESG, is hard-working, extremely organized, detail and process-oriented, resourceful, personable, and has the ability to multi-task in order to accomplish assignments in a timely manner. Problem-solving will be held in the highest esteem.

A successful candidate will possess the following skills and attributes:

- Strong interest in the solar industry and decarbonization
- Excellent verbal and written communication skills
- Problem-solving and troubleshooting
- A proactive, can-do attitude and lots of enthusiasm
- Google Certification preferred
- Ability to adapt to changes in processes as directed from outside state and regulatory authorities
- Bachelor's degree in process preferred

Location & Hours: This is a summer internship and will be remote (USA).

Commitment & Compensation: Competitive compensation,, and the opportunity to work in a fully remote environment.

Salary: Please submit a resume, cover letter to careers@carbonsolutionsgroup.com

Deadline: We hope to hire for these positions by April 30th for a May 15 start date.

Carbon Solutions Group is an equal-opportunity employer, and does not discriminate based on gender, race, ethnicity, orientation, creed, or other traits.

Job Type: Internship
